

NAME OF THE PRODUCT: NUCLEOFORCE® AQUA

nucleoforce Aqua™ is a concentrated balanced free nucleotides and active precursors, obtained from yeast.

The unique composition of Nucleoforce Aqua™ is designed to meet precisely and specifically the needs of aquaculture species, helping the optimal development of the immune system and digestive system.

Thanks to its exceptional features, minimizes the intestinal inflammatory response in diets with high inclusion of plant raw materials, helping to enhance the digestibility of the diet and improving gut health of animals.

COMPOSITION: Yeast extract obtained from dead cells of *Saccharomyces*

Cerevisiae, Silicic acid (E551a).

ANALYTICAL COMPOSITION:

Nitrogen Kjeldahl	Not less than 9.6 %
Crude protein ($N_{Kj} \times 6.25$)	Not less than 60.0 %
Loss on drying (Moisture)	Not more than 8.0 %
Crude Ash	Not more than 28.0 %

PHYSICAL PROPERTIES:

Appearance: Fine grain, cream-brown powder

MICROBIOLOGICAL ANALYSIS:

<i>Salmonella</i>	Absence / 25g
<i>Enterobacteriaceae</i>	Not more than 10^3 / g

DOSIFICATION: 200 – 1.000 g/Tn per final ton of feed.

PACKAGING: - 5, 20 or 25 Kg Kraft drum with 2 polyethylene inner bags, black plastic lid and lower and upper reinforced galvanized strip hoop.

STORAGE: It is stored at room temperature protected from humidity, in a sufficiently ventilated area.

SHELF LIFE: 18 months from the manufacturing date.

INTENDED USE AND ANIMAL SPECIES: Its special profile of Nucleotides helps animals develop their immune and digestive systems.
Especially indicated for use in aquatic species (fish and shrimps).

INFORMATION FOR FEED FORMULATION: Nucleotides concentration: 30%
